Re: PP Docket No. 00-67, CS Docket No. 97-80

Dear Ms. Mort:

Per your request, I am attaching a chart showing estimates of the percentage of cable customers expected to be served by cable systems of 750 MHz or greater at year-end 2003, 2004 and 2005. The chart is based on projections provided by Kagan World Media in August, 2003. It shows that, as of YE 2003, 77% of cable customers are expected to be served by cable systems of 750 MHz or greater, that 84% of cable customers are expected to be served by such systems by YE 2004, and that 86% of cable customers are expected to be served by such systems by YE 2005.

If you have any questions, please contact me.

Sincerely,

Neal M. Goldberg

cc: Marlene H. Dortch, Secretary, FCC (for inclusion in the above-referenced dockets)
